Summary

I am a self-taught Full Stack Software Engineer coming up on 3 years of on-the-job experience. I have a strong background in JavaScript/React, Java/Spring, Microservices, PostgreSQL, REST, Docker, AWS, and DevOps. I love people and have years of experience training, running meetings, and managing projects. I am passionate about technology and fostering team growth and am eager to contribute over 10 years of varied experience to a positive team.

Education

M.S. in Computer Science - Georgia Southwestern State University - 2023

B.S. in Business Management - University of Colorado, Colorado Springs – 2019

Experience

Full Stack Software Engineer | Every Home – Nov 2024 – Present

Lead development of an AWS Amplify hosted application using AppSync, DynamoDB, Cognito, Lambda, and more.

Introduced team CI/CD and DevOps practices. Improved code-wide data structures with MVC and OOP focused coding.

Full Stack Software Engineer | Stratagem Group (now Arka) – Feb 2023 – Oct 2024

Developed a full stack, microservice-based web application to access real time information about satellite locations and statuses.

Maintained data with PostgreSQL and JPA. Leveraged Spring for a performative backend. Tested REST APIs with Postman, Swagger, etc. Maintained multiple test and prod environments.

Internal Communications | Ent Credit Union – 2021 – 2022

Managed internal communications strategies and initiatives through email and content creation.

Collaborated with various departments to ensure effective internal messaging.

Senior Member Service Representative | Ent Credit Union – 2016 – 2021

Assisted with complex financial transactions including opened/maintaining IRAs, Trusts, Certificates, and various other financial services.

Responsible for auditing cash drawers and vaults. Trained and mentored junior staff members.
